**RE: Senate Bill 501 – CO-SPONSOR
As Introduced February 19, 2025**

Dear Senator Allen:

On behalf of the Rural County Representatives of California (RCRC), we are pleased to co-sponsor your Senate Bill 501 regarding household hazardous waste. RCRC is an association of forty rural California counties and our Board of Directors is comprised of elected supervisors from each member county.

Senate Bill 501 requires manufacturers of certain types of products that become household hazardous wastes at the end of their useful lives to participate in a producer responsibility program to provide a free and convenient collection and management system for those products. Products included in SB 501 include pesticides, aerosols, oxidizers, cleaners, adhesives, solvents, lubricants, compressed gas, lithium batteries, and vapes.

Local governments are responsible for the collection, processing, recycling and disposal of solid waste, including the operation of local household hazardous waste collection programs. These local programs, which include permanent facilities and drop-off events, provide important public services and prevent improper disposal of hazardous waste. Local governments also use local household hazardous waste programs to manage illegally disposed or abandoned household hazardous wastes, which are often dumped on public lands and rights-of-way. Our local programs often offer residents free drop-off of HHW; however, the cost to manage some of the waste streams are significant and put serious financial pressure on both the programs and local governments that operate them. The cost for local governments to manage some types of household hazardous waste can often approach or exceed the initial purchase price that consumers pay at the point of sale.

Page 2

Local governments and the solid waste industry have no control over which products will be introduced into the marketplace, and for which we will ultimately be responsible for management and disposal. We support efforts like SB 501 to ensure that manufacturers bear financial responsibility for the management and disposal of the products they introduce into the stream of commerce – especially for waste streams that are difficult or expensive for local governments to manage. By compelling manufacturers to bear responsibility for these costs, and making proper disposal opportunities more convenient for residents, we hope that SB 501 will drive manufacturers to improve product design to make those products safer and easier to manage at the end of their useful lives.

Because this bill will significantly reduce local costs for managing household hazardous waste and increase convenience of safe disposal opportunities, RCRC is pleased to co-sponsor your SB 501.

If you should have any questions, please do not hesitate to contact me at jkennedy@rcrcnet.org.

Sincerely,

JOHN KENNEDY
Senior Policy Advocate
