

Vita Quinn
Director of Management Services, SCS Engineers
NSAC Board Member

Vita Quinn is a management consultant with 19 years of experience in planning, strategy, operational efficiency, and financial sustainability. Her work focuses on designing sustainable cost recovery models, evaluating municipal finance systems, and advising on effective management strategies for essential public services. Her work spans both the U.S. and Africa, with a strong track record supporting utilities and governments in aligning financial strategies with operational goals and plans for growth.

Her technical expertise includes non-ad valorem special assessments, fiscal impact analysis, cost-benefit modeling, capital planning, bond feasibility, and impact fee development. In the utility sector, she has advised on cost apportionment and rate, fee, and tax design for solid waste, recycling, stormwater, water, and sewer services.
